

Prof. Dr. Elke Dittmann

Research Statement

I am intrigued by chemical mediators and their role in structuring microbial communities and host-microbe interactions. My focus is the investigation biosynthetic pathways of specialized compounds in cyanobacteria as well as their evolutionary diversification, biotechnological exploitation and spatial and temporal distribution in microbial communities. I am particularly interested in bloom-forming freshwater cyanobacteria and terrestrial symbiotic cyanobacteria.

Academic Track Record

Since 2009	Professor of Microbiology at U Potsdam
2003-2009	Junior Professor of Molecular Ecology, HU Berlin
2002-2003	Scientific Assistant, Institute for Freshwater Ecology and Inland Fisheries Berlin
2000-2001	Humboldt Research Associate with Prof. B. Neilan, UNSW Sydney, Australia
1997-2000	Postdoctoral Researcher, HU Berlin
1994-1997	PhD Student, HU Berlin

Selected Commissions of Trust

2020-2022	Managing Director at Institute of Biochemistry and Biology, U Potsdam
2016-2020	Editorial board member of "Cell Chemical Biology"
2015-2017	Editorial board member of "Environmental Microbiology"
2022-	Member of the advisory board of the Cluster of Excellence "Controlling Microbes to Fight Infections" Tübingen
2015-	Member of advisory board of DECHEMA section: "Niedermolekulare Naturstoffe mit biologischer Aktivität"
2012-2018	Member of the advisory board of the Leibniz Institute for Natural Product Research and Infection Biology, Jena
2010-2021	Speaker of the VAAM section "Biology of bacteria producing natural products"

Publication Profile

125+ publications in international peer-reviewed journals, including Proceedings of the National Academy of Science USA, Nature Chemical Biology, Angewandte Chemie International Edition, Molecular Biology and Evolution, Current Biology ...

Web of Science: h-index 53, >9.000 citations, 25 papers with >100 citations.

Google Scholar: h-index 59, >14.000 citations; 43 papers with >100 citations.

Awards

- 2009 Junior Scientist Award for Natural Product Research of DECHEMA
2000 Feodor Lynen grant of the Alexander-von-Humboldt Foundation
