

illuminai

Full-stack Developer (m/w/d)

Company description

Welcome to *illuminai*, the pioneer in the world of digitalization! Our first product, **SWAP**, helps companies find the right enterprise software by automating and simplifying the selection process. **SWAP** uses technologies such as LLMs, NLP/NLG and web crawling, and provides a platform for exchange and collaborative selection.

We have already successfully raised over €200,000 in funding and would now like to scale our solution with your help. Why do we need you? Imagine developing the latest algorithms and using them in real use cases to make software selection even more precise. If that sounds like you, you've come to the right place! **SWAP** has already become a benchmark thanks to state-of-the-art tools and continuous improvements in recent years and is about to be launched. If you want to live out your passion for software development in an environment that emphasizes innovation, team spirit, experimentation and personal development, then *illuminai* is the ideal place for you.

The role

- **Full-stack development:** You will be responsible for both frontend and backend development to continuously enhance our SWAP platform
- **Innovation:** Introduce creative solutions to optimize the software selection process for our users.
- **Quality assurance:** Ensure the smooth functioning of our product through thorough code tests
- **UI/UX design:** Design and implement intuitive, user-friendly interfaces that improve both the visual and functional aspects of our platform.

Your skills

- **Technical skills:** You have experience with JavaScript, React, Node.js, Python, Django, SQL/NoSQL databases, TailwindCSS, and Docker.
- **Quick learner:** You can quickly learn and effectively implement new technologies.
- **Development tools experience:** You are familiar with GitHub, continuous integration/delivery, and you have some experience with cloud deployment (AWS ECS is a plus).
- **Problem-solving ability:** You think solution-oriented and are ready to take on new challenges.
- **The usual stuff:** You think out of the box, are hands-on, like to go the extra mile and have an "I'll just do it" attitude. Great, then we're waiting for your application!

What we offer

- **Impact:** You can be part of a rising startup from the beginning and significantly influence its development.
- **Creative environment:** A dynamic and innovative work environment where your ideas and proposals are valued.
- **Attractive compensation package:** In addition to competitive salary, we offer additional benefits and professional development opportunities.
- **Flexible working Hours:** Benefit from flexible working hours with a 20-hour week, allowing you to better balance work and personal life.

What's next

Apply now at *illuminai* and join a team aiming to revolutionize the software selection process! Send us 1-2 of your projects and your resume to hi@illuminai.de. More information can be found on our website <https://illuminai.de> and <http://swap.softwarematch.de>.

We look forward to your application!
